PUBLIC NOTICE OF HAZARDOUS WASTE PERMIT MODIFICATION

The Illinois Environmental Protection Agency (IEPA) hereby gives notice of intent to modify a Resource Conservation and Recovery Act (RCRA) hazardous waste management permit held by Honeywell International, Inc. for their facility in Metropolis, Illinois. Honeywell monitors and maintains four surface impoundments containing calcium fluoride sludge (considered hazardous waste due to its high pH) and manages various other hazardous wastes in two container storage units under its RCRA permit. The modification requests, if granted, would allow Honeywell to construct temporary cover systems over the impoundments and extend the closure deadline for them to December 31, 2025 provided Honeywell also receives approval from U. S. EPA for these activities.

The interested public is invited to review copies of the permit modification application, draft permit modification and related fact sheet, at the **Metropolis Public Library, 317 Metropolis St.**

Send written comments and/or hearing requests on the draft permit to the Agency contact listed below, postmarked by midnight, **January 11, 2016**. Timely comments will be evaluated in making the final permit decision. Written public hearing requests must state opposition to the draft permit and the nature of issue(s) to be raised at the hearing. Public notice will be made 45 days prior to any hearing.

The Administrative Record (modification application, draft permit and all supplemental data submitted to the Agency) is available for inspection by appointment only at IEPA's Springfield office. Please contact:
